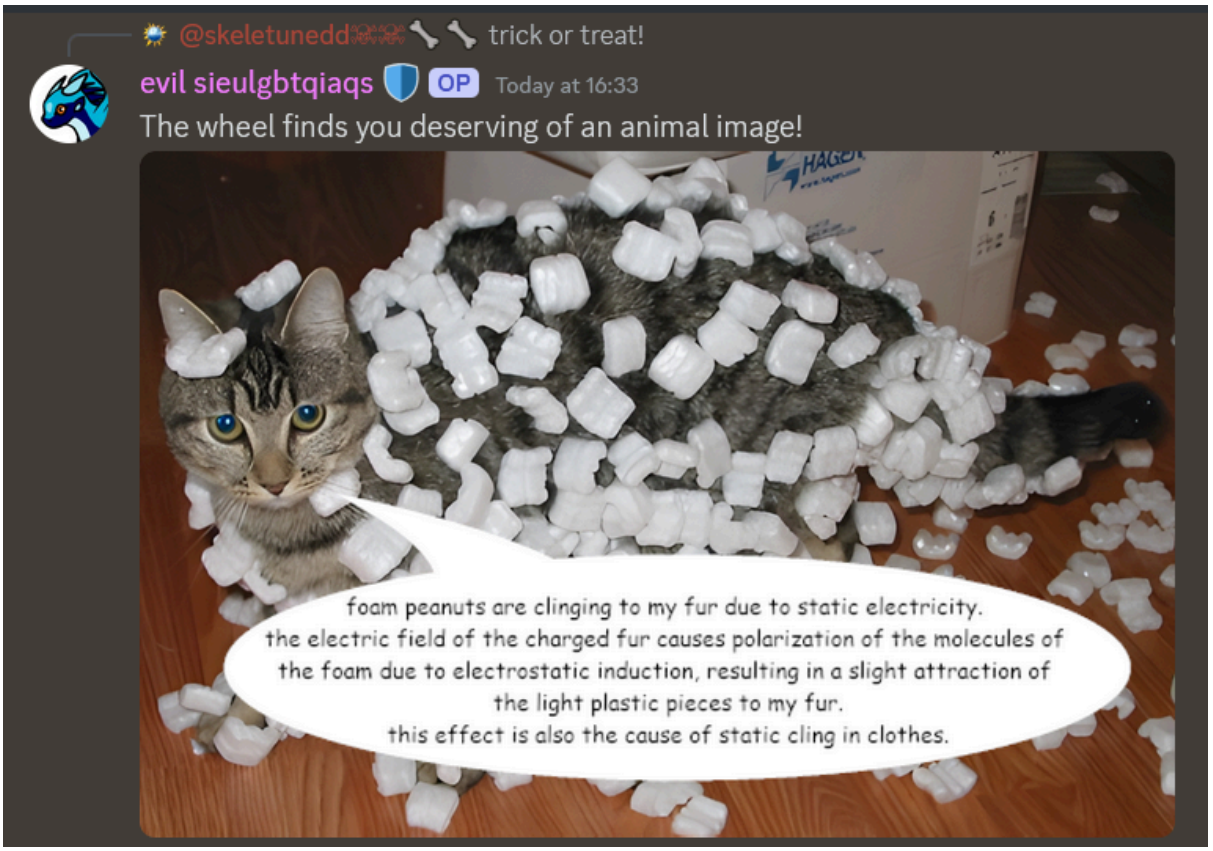
57. Foam peanuted cat (from tisqbisque)



@skeletunedd trick or treat!
evil sieulgbtqiaqs OP Today at 16:33
The wheel finds you deserving of an animal image!
foam peanuts are clinging to my fur due to static electricity.
the electric field of the charged fur causes polarization of the molecules of the foam due to electrostatic induction, resulting in a slight attraction of the light plastic pieces to my fur.
this effect is also the cause of static cling in clothes.
